EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Krull on May 22, 2006. The application has been amended as follows:

In the claims:

Claim 11 (currently amended)

Line 19, "seat." has been changed to –seat; and
a resisting means, interconnected between the frame and the upper body support, for resisting downward movement of the upper body support relative to the frame; and
wherein the second frame portion is disposed beneath a planform defined by the seat, and the third frame portion is disposed beneath the planform defined by the seat.

Cancel claim 19.

Claim 20 (new)

An exercise apparatus, comprising:

a frame configured to rest on a floor surface;

a seat mounted on a first portion of the frame;

Art Unit: 3764

an upper body support pivotally mounted on a discrete, second portion of the frame, wherein the upper body support and the frame cooperate to define a first pivot axis, and the upper body support is configured and arranged to extend generally vertically upward in front of the seat;

a lower body support pivotally mounted on a discrete, third portion of the frame, wherein the lower body support and the frame cooperate to define a discrete, second pivot axis, and the lower body support is configured and arranged to extend generally horizontally outward beneath the upper body support and forward of the seat; and

a constraining means, interconnected between the lower body support and the upper body support, for constraining the upper body support and the lower body support to pivot toward one another, and in respective, opposite directions relative to both the frame and the seat, wherein the seat is rigidly secured in place on the first portion of the frame; and

resisting means, interconnected between the frame and the upper body support, for resisting downward movement of the upper body support relative to the frame.
